Dotec-Audio DeeRAM
User's Guide

About DeeRAM

Thank you for choosing Dotec-Audio DeeRAM.

This plug-in allows you to temporarily record and play back the input sound in a bank.
By using this plug-in to record and play back the contents of the mixdown, you can replace the performance on your DAW, reduce the load on soft synths, etc., and set a small buffer to enable mastering operations with low latency.
The recording data will be automatically erased when the plug-in is deleted or the DAW is closed.

Installation on Windows OS

Those plug-ins are provided as a .dll and .vst3 and .aaxplugin folder（AAX）.
To install the plug-ins, simply copy it to your system's shared VST or VST3 or AAX folder.
AAX folder : C:¥Program Files¥Common Files¥Avid¥Audio¥Plug-Ins
If you're not sure where that is, please consult your music software's documentation.
If your music software is already running, you'll probably need to quit and restart if before the plugin is recognised.
Some plug-ins come in 32-bit and 64-bit versions. If you're not sure which to use, please consult your music software's documentation.

Installation on MacOS

1. Those plug-ins are provided as a .vst (VST) and .component (AU) files and .aaxplugin（AAX）files.
2. To install the plug-ins, open "**install.pkg**" and follow the installer instructions.
3. If your music software is already running, you'll probably need to quit and restart before the plugin is recognised.

Panel Description

POWER button :
  Enables DeeRAM. Off bypasses it.

SIDECHAIN:
   Switches the input source to the sidechain input.

DELETE :
   Deletes the recording of the selected bank.

MEMORY BANK :
   Selects one of four banks (A to D).
  The status of each bank is as follows:

  OFF: No selection or recording.
  Yellow: Selected bank.
  Red: Already recorded bank

Recording button:
   When the Record button is on, and the DAW is played back, recording will start.
   The recording will stop under one of the following conditions.

   When the DAW is stopped.
   When the stop button is pressed.
   When loop playback of the DAW returns.

Playback button:
   Loop playback of the selected bank from the position of the DAW's time ruler.
   If it is outside the recording range, playback will start from the beginning of the recording.

Stop button :
   Stop recording/playback.

How to Register
