

DOTEC-AUDIO BROADCAST PACK

User's Guide

About BROADCAST PACK

Thank you for choosing Dotec-Audio BROADCAST PACK.

This package includes “Maximizer **DeePopMax**”, “Equalizer **DeeEQ**”, “Auto leveler **DeeTrimCast**”.

Installation on Windows OS

Unzip the downloaded file and execute the included "Setup.exe".

The plug-in files are installed in the following folders.

VST2

64-bit: *C:\Program Files\Common Files\VST2*

VST3

64-bit: *C:\Program Files\Common Files\VST3*

AAX

C:\Program Files\Common Files\Avid\Audio\Plug-Ins

Installation on MacOS

1. Those plug-ins are provided as a .vst (VST) and .component (AU) files and .aaxplugin (AAX) files.
2. To install the plug-ins, open “**install.pkg**” and follow the installer instructions.
3. If your music software is already running, you'll probably need to quit and restart before the plugin is recognized.

How to Register

The DOTEK-AUDIO product becomes the "**product version**" by registering the serial key and e-mail address in the "**demo version**".

This section describes how to register the serial key you purchased.

Step 1

You can register serial key by clicking registration button.

Step 2

A screenshot of a 'Registration' dialog box. The title bar says 'Registration'. Below the title, it says 'Please enter the serial key and your e-mail address for the registration.' There are three input fields: 'Serial key', 'E-mail address', and 'E-mail address(Verify)'. Each field has a red arrow pointing to it. At the bottom, there are three buttons: 'Open the shopping page', 'Cancel', and 'OK'. The 'OK' button is highlighted with a red rectangle.

This window will be displayed.

Please enter a serial key and your email address in the textbox and click OK button.

*** The registration requires an internet connection.**
